

Karaoke Kit – Program Suggestions

- **TIP:** Looking for different songs than the ones included? Download a karaoke app onto an iOS or Android device and plug the phone into the machine to hear the music from there. Some apps include: *Sing! Karaoke by Smule*, *Karaoke for Kids* and *StarMaker*. *Note: If connecting through the AUX cord only, the lyrics will not be displayed on the machine, only on the device.
- Karaoke Roulette – write down the names of participants and place them in a hat. Choose a karaoke song at random, then pull a name. The person who is called up must sing the song that was just chosen.
- Blind Auditions (somewhat like *The Voice*) – have 3-4 participants sit with their chairs turned away from the singing area, and give each one some paper and a pencil. Have the singing participants come up randomly and sing in funny voices. The participants in the chairs will have to guess who they think was singing. The first one to hold up the correct name wins!
- Live Music Video – Create groups with one or two people as the singers, while the other group members use props and the space around the singer(s) to make it look like they are part of a music video. This could be made a competition to see which group can create the most zany and over-the-top music video.
